Phase 3: Identify Priority Actions	Phase 4: Develop Implementation Plan	Outcomes
Evaluate priority actions to determine best practices based on updated models and targets	Develop a shared roadmap to improve lake and beach conditions	Compact members are united around a common vision
Review and recommend private and public green infrastructure	Review and update cost information associated with recommended actions	Compact members are accountable to the action plan
Review and recommend land-use changes to support watershed resiliency	Identify needs and approaches for carrying out recommended actions	Compact members and the general public support the implementation of the action plan
Develop a nutrient budget	Gather public feedback on the action plan	
Develop inventory and standards to monitor shoreline and beach health	Determine the timeline for plan implementation
